QUALITY MATTERS

Project: Wimpole Street

Location: Marylebone, London

Year: 2020

Designer/Administrator: Josephine Glynn

Project Description:

This project involved a full change of layout to accommodate new treatment rooms designed for celebrity treatments. The refurbishment aimed to create a luxurious and private environment with state-of-the-art facilities. Attention to detail in design and materials ensured that the space met the specific needs of high-profile clients.

Project: Eastcastle Street
Location: Fitzrovia, London
Year: 2023
Designer: Urban Infill

Project Description:

A full gallery refurbishment and redesign project that involved introducing new lighting and completely reconfiguring the space. The goal was to create an inviting and functional gallery environment that enhanced the display of artworks. The redesign included modern lighting solutions and a layout that improved the flow and experience for visitors.

Project: Woodstock Studios

Location: Shepherd's Bush, London

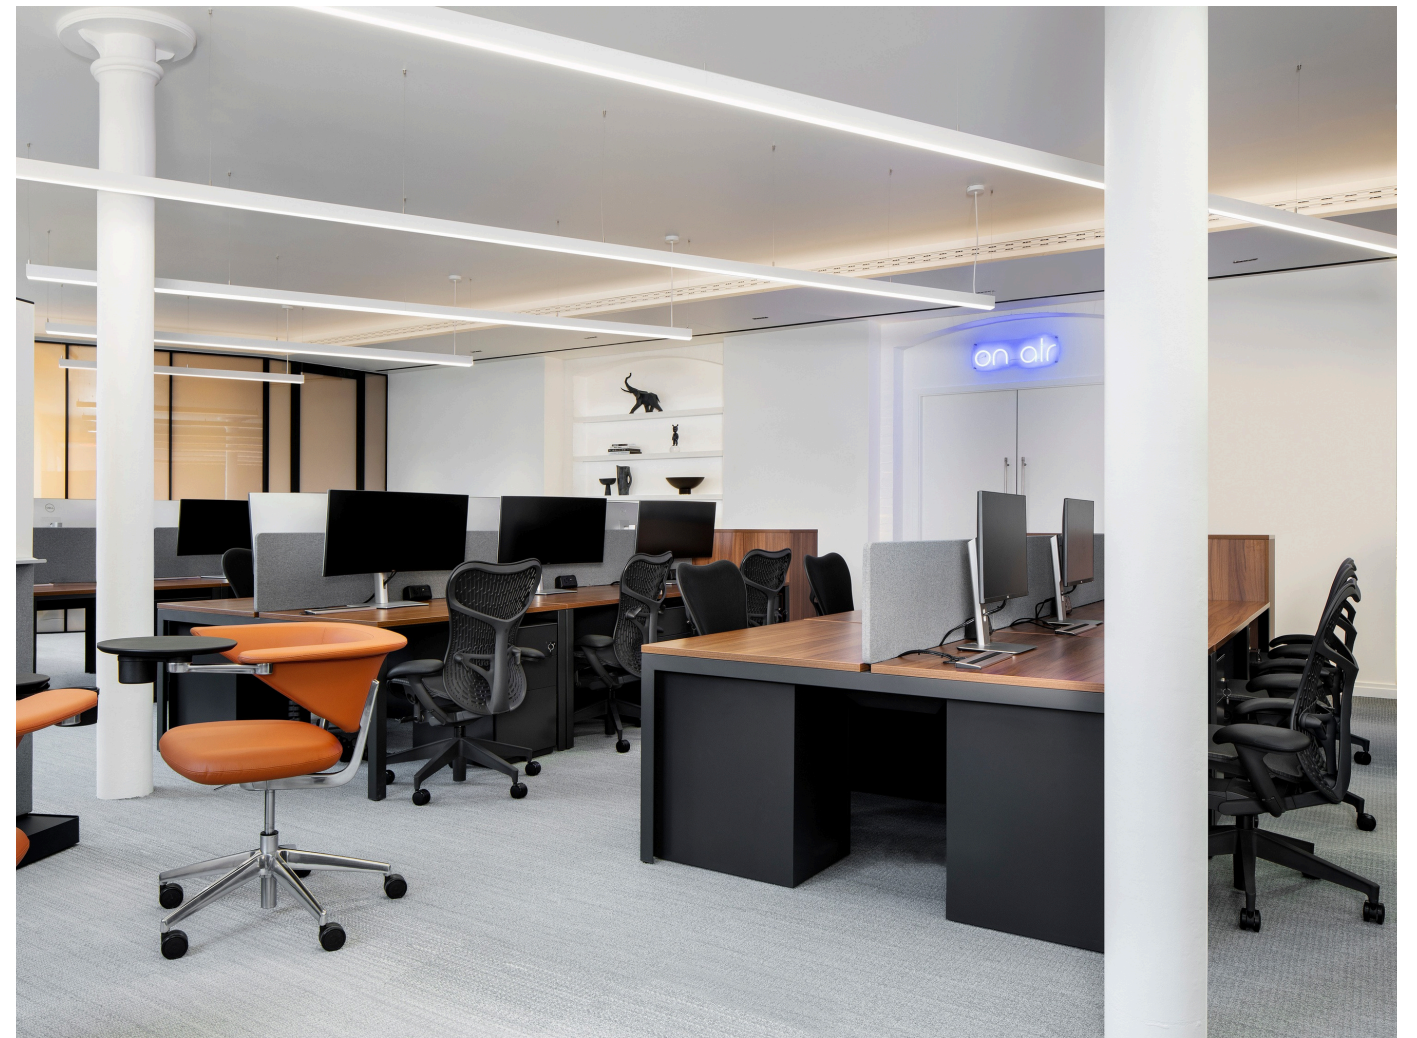

Year: 2023

Designer: Harrods Interior Design

Project Description:

The complete transformation of Annie Lennox's former studios into a modern office setting represents a stunning fusion of creativity and functionality. The space now boasts an elegant blend of professional workspaces and private leisure facilities.

Luxury shower facilities and a comfortable sleeping room offer an unparalleled level of convenience. The addition of a private office and inviting meeting spaces further enhances productivity and collaboration. Harrods Interior Designer created a harmonious space where work and leisure coexist harmoniously.

Project: Edel Assanti

Location: Fitzrovia, London

Year: 2021

Designer / Architect: Sanchez Benton

Project Description:

A full gallery refurbishment that included significant changes to the layout, lighting, and staircase positioning. The project aimed to enhance the gallery's functionality and aesthetic appeal, creating a dynamic space that could accommodate various exhibitions. The new design improved the visitor experience and allowed for more flexible use of the gallery.

Project: Buckingham Gate
Location: Belgravia, London
Year: 2021
Designer / Architect:

Project Description:
This complex project involved the demolition of an existing building in a confined space, requiring meticulous planning and execution. Structural works were essential to support neighboring buildings throughout the process. The project ensured the safety and stability of the surrounding area while preparing the site for future development.
